Frontend Developer – React.js/Vue.js

Description

We are looking for a great JavaScript developer who is proficient with Vue.js or React.js. Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows (such as Flux or Redux). You will ensure that these components and the overall application are robust and easy to maintain. You will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

Responsibilities

- Participate in creative and planning sessions for new projects to identify and estimate front-end development requirements.
- Convert visual designs and wireframes into functional web pages and associated assets (JavaScript, HTML, CSS, images, etc.).
- Actively engage and collaborate during UI development to help identify new approaches for enhancing the overall user experience.
- Lead the discovery and assessment of front-end technologies and put forth recommendations for their use.
- Work together with back-end developers to integrate UI into functional deployment-ready pages.
- Ensure all products are delivered on-time and to the highest level of standards.

Skills

- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model
- Thorough understanding of React.js or Vue.js and its core principles
- Experience with popular React.js or Vue.js workflows (such as Redux and Vuex)
- Familiarity with newer specifications of ES6+
- Experience with data structure libraries (e.g. Immutable.js, Rx.js)
- Familiarity with RESTful APIs
- Knowledge of modern authorization mechanisms, such as JSON Web Token
- Familiarity with modern front-end build pipelines and tools
- Experience with common front-end development tools such as Babel, Webpack, NPM, etc.
- Ability to understand business requirements and translate them into technical requirements
- A knack for benchmarking and optimization
- Familiarity with code versioning tools (such as Git and Github)
- Familiarity with Scrum/Agile tools (Azure DevOps, KanBan, Trello or Jira)

Experience

- Must be expert in the use of computers and the Internet;

Valid through

30.10.2020
